Education

- Currently pursuing **Bachelor of Technology** at Invertis University (2024-2028), with a current CGPA of **8.1**.
- Completed **Class 12th (UP Board)** in 2024 with a score of **85%**.
- Completed **Class 10th (UP Board)** in 2022 with a score of **83.5%**.

Skills

- **Programming:** Python (intermediate), C (basic), Java (Intermediate)
- **Web Technologies:** HTML, CSS, JavaScript, Node.js, Express.js, React.js, Bootstrap , Tailwind
- **Data Base:** SQL , MongoDB
- **AI/ML Frameworks:** Scikit-learn, Pandas, NumPy
- **Tools & IDEs:** Git, GitHub, Jupyter Lab, Visual Studio Code, Postman
- **Visualization:** Matplotlib , seaborn

Projects

Airbnb Clone (Full Stack Web Application)

Jan 2026 – Mar 2026

MongoDB, Express.js, HTML, CSS, JS, Node.js, Sessions, REST APIs

Individual Project

- Designed and developed a full-stack Airbnb clone enabling users to explore, list, and manage rental properties.
- Implemented secure **authentication and authorization using sessions and cookies**, including login, signup, and protected routes.
- Built scalable backend following **MVC architecture**, ensuring clean code organization and maintainability.
- Developed RESTful APIs for property listings, bookings, and user management with full CRUD operations.
- Integrated MongoDB for efficient data storage and optimized queries for improved performance .
- Applied middleware, input validation, and error handling to enhance backend security and reliability.
- Managed user sessions securely using **express-session**, ensuring proper session handling and access control.

House Price Prediction Using Machine Learning

Jan 2026 – Feb 2026

Python, Scikit-learn, Pandas , seaborn , matplotlib

Individual Project

- Developed a **machine learning regression model** to predict house prices based on multiple housing features.
- Conducted **data cleaning, feature engineering, and exploratory data analysis (EDA)** using Pandas and visualization libraries.
- Implemented **Linear Regression** using Scikit-learn and optimized the model for better prediction performance.
- Evaluated model performance using **R² Score, MAE, and RMSE** and visualized prediction results.

Notes Taking Web Application

Nov 2025 – Dec 2025

HTML, CSS, JavaScript, Bootstrap

Individual Project

- Built a **client-side notes management web application** to create, edit, and delete notes dynamically.
- Used **JavaScript Local Storage API** to store and retrieve notes without a backend database.
- Implemented **DOM manipulation and event handling** for real-time updates to the notes list.
- Designed a **responsive UI using HTML and CSS** for smooth user interaction.

Certifications

- **AI Skills Passport** - EY and Microsoft
- **Foundations: LLM For Young Developers** – Future Skills Prime and Meta
